

Mach 5 Aviation presents:
Twin Tecnam Multi-Engine & G950 Training Day

Saturday April 23, 2022, 8:00 am to 12:00 pm
Auburn Municipal Airport Terminal Building

Get your multi-engine rating this spring in this awesome, stealthy looking twin-engine special mission platform aircraft!

To kick things off right, we have scheduled a group class for April 23rd from 8:00am-12:00pm and created a **special discounted package** that includes all you need to ace your tests and be rated to fly a twin.

Price: **\$4,450** Value: **Priceless**

Ground School & Training Course (four-hour classroom training day) includes:

- Multi-engine Operations
 - Multi-engine aerodynamics
 - Multi-engine operations
 - Tecnam systems
 - Tecnam performance
- Garmin 950 (VFR operations)
- Garmin 950 (intro to IFR operations)
- **Ten (10) hours of flight training with your MEI**
- **Ten (10) hours of ground instruction with your MEI** (in addition to the 4-hour class)
- Online Multi-engine and Tecnam courses, provided by Flight Apprentice
- Mach 5 Swag Bag, snacks and fellowship with other pilots included in class!
- FAASTeam Wings Credit (Advanced Knowledge)
- **A \$5,790.00 value, saving you more than \$1,000!**

★ Please note:

Checkride (FAA designated pilot examiner) fees not included

Purchase is non-refundable after the ground course begins or once a flight is conducted.

About the Tecnam P2006T SMP

“What is that?!” Yep, every time we land this baby draws a crowd. The revolutionary Tecnam Special Mission Platform is an Italian, high-winged, twin-engine, retractable-gear, all-metal, light aircraft built by Costruzioni Aeronautiche Tecnam, founded in 1986 and based in Capua, Italy. Tecnam is powered by Rotax, offers an advanced IFR glass cockpit with other impressive navigational aids, and has established itself as the most cost effective and efficient flying solution for surveillance, observation, aerial mapping and special mission tasks around the world. This is one cool rig designed for a whole new generation of pilot. Get in. Go fly. And enjoy every minute of becoming a TECH Driver this spring, you won’t regret it.

HORSEPOWER 200 • MAX CRUISE 150 KTS • MAX RANGE 669 NM • USEFUL LOAD • 906 LBS

What are you waiting for?

Space is limited for this training program. Register today to get your hands on the yoke, your seat in the cockpit and a multi-engine rating accomplished.
